# Black Jack

You are staking your chances of drawing cards that total more than the Dealer's without exceeding 21. If you do this, you receive an Even money payout and retain your original stake, except when...

1. A score of 21 with 2 cards ("Natural" or "Black") payout = 3 to 2
2. Dealer gets BlackJack , all stakes taken except players with the same score. They retain their original stake but do not get paid out
3. A tie of scores (Dealer and any player) the original stake is retained

## HOW TO PLAY

**PLACE** your stake inside the box in front of you on the table

**THE DEALER** will deal first card face up to each player, then to himself,

**A SECOND CARD** is then dealt to each player

**IF YOU ARE HAPPY** with the total of your 2 cards then you can 'stand'.

**PLAYERS** can draw cards to better there hand, be careful you may go bust.

**FINALLY** the dealer deals his second card. If his hand is 16 or less he must draw another card. If his score is 17 or more, he must stand and pay out those with a higher score upto & including 21.

# Black Jack... continued

**CARDS** USE FACE VALUE, **PICTURE CARDS** COUNT AS 10, **ACE** NOMINATED 1 or 11

If your two cards total 9,10 or 11 you can double your stake and draw 1 more card. **Only do this when the dealer's card is 7 or less.**

Pairs of cards (except 4,5 & 10) may be split & receive 2 more cards.

**Only do this if the Dealers card is 7 or less (Blackjack scored on split hand counts as 21)**

## Casino Stud Poker

**Opening** bets are placed in the 'ante' boxes. Each player + dealer are then dealt 5 cards face down, the dealer's 5th card is dealt face up.

**If** you have a hand, place your cards face down in the 'raise' box with your bet which must be **DOUBLE** your 'ante' bet. If you're not happy with your hand, throw in your cards and you lose your 'ante' bet

**The** dealer will then open his hand & players beating him will be paid out as shown. If the dealer has no hand he will payout only 'ante' bets & 'raise' bets will stand.
